Re: 75 The Donway West

I would suggest that a **professional office level / community health centre component (non-luxurious) be brought forth as part of the proposed community centre.**

It is time to look at **creating solutions that bring winning, better outcomes for all sides.** Something at the corner near public transportation would be of **great benefit to seniors and all other residents.**

This would imply that **no conversion of 75 Donway West proceeds until the new community centre be ready for a transfer of offices!** If Parkway Forest got a new \$20 million community centre surely, **Don Mills deserves nothing less.**
