Dear Cliff

I would appreciate your reading my letter published in North York Mirror dated 22 Feb./08 as follows:

## The Donway needs its medical centre

When it comes to our concentrated medical facilities at 75 The Donway W., physicians, dentists, laboratory, X-ray and more, all accessible under one roof, I cannot be more explicit than to say: I hope that the councillors and other government officials will understand the importance of this medical building.

Cadillac Fairview proposes to convert

this building into senior residences and in this way expects profits to increase.

I am compelled to protest these changes. Let Don Millers enjoy the facilities established in our medical building and let Cadillac Fairview demonstrate humanitarianism in its conduct.

Mary Ampagoumian

Now, let me quote what Christopher Hume stated "Final decisions regarding development rest with councillors".

Cliff, Don Millers look to you for this very important issue as stated in the above letter. Don Millers have given Cadillac all they wanted but in the case of 75 Donway West, the Medical building, Don Millers are developing very strong faith in our councillors to protect us and I am sure councillors can persuade Cadillac with a sincere approach in this problem.

Why, why, will Cadillac change 75 Donway West into senior residences? If Cadillac wants to become demonstrative in their actions to the seniors, why not demonstrate their humanitarianism in keeping our medical building by even working towards the betterment of the medical services by adding more medical facilities. This building is more important in their medical services to the seniors than "senior residences". Cadillac can build one such "senior residences" in one of the condos.

Sincerely

Mary Ampagoumian
